

\$49.95 Air Duct Cleaning Special!

Does it sound too good to be true? That's because it is!

We receive phone calls on a daily basis in regards to these coupons. A company advertises Air Duct Cleaning for \$49.95 but when the company arrives; it quickly turns in to a \$1000, \$2000, and even upwards of \$10,000 invoice. The company makes claims of the home having "Stage 3" mold or "Unlivable" levels of mold and explains that you need to get the kids out of the home. Well anyone with children would be scared; so what do you do? Well, most people end up paying a ridiculous amount of money for little to no work. If this happens to you BEWARE!

-How do I know if I'm being scammed?

1. The company makes claims of mold in the duct system or coil and tries to force/scare you into buying a product or spending an extravagant amount of money right then and there.
2. They tell you to get the kids out of the home.
3. They offer to do a "Room-to-Room" Remediation for the entire home and claim it can be done that day. Most experts say this kind of work is performed over several days.

-Mold

If a company comes into your home and claims that you have mold; do one of following:

- Ask to see their Mold Certification
- Contact an Industrial Hygienist
- Ask what kind of mold it is (there are only a few that are very harmful)
- Don't let them force/scare you into making snap decisions; if they do, get a second opinion

Most experts say that every home has "livable" mold and there is usually more mold outdoors than inside your home.

-Chemicals

At Mite-E-Ducts, we offer Fungistat Treatments & Deodorizer Treatments. You cannot mix chemicals together. You must choose one or the other. We have found that these \$49.95 air duct cleaning companies are mixing multiple chemicals together before introducing them into your duct system which is incorrect and can be unsafe.

- The safest non-chemical solution is an Ultraviolet Germicidal Light System.
